Laght-reill Ushtey as Sornaigys Ellan Vannin

Public Notice

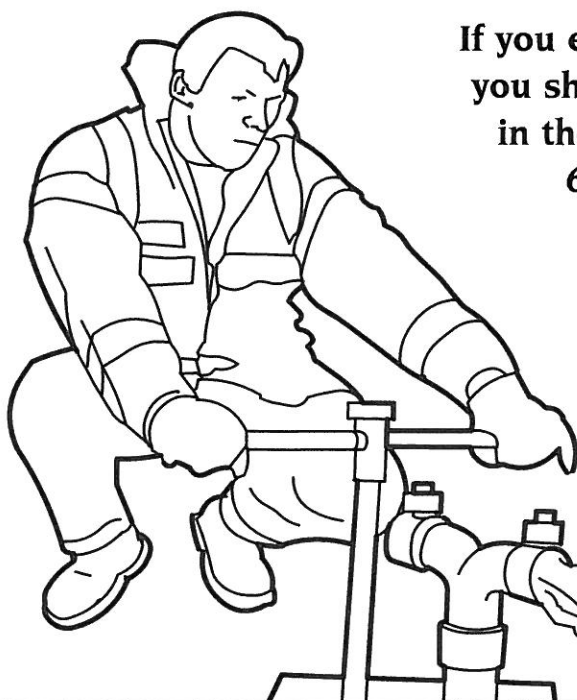

Trunk Main Flushing Exercise in Peel

The Isle of Man Water & Sewerage Authority will be carrying out a flushing exercise on the trunk main from Glen Maye to Peel. The work is planned to take place in the **late evening of Tuesday, 8th November 2011 continuing into the early hours of Wednesday, 9th November 2011.**

Customers are advised that this activity could affect the water supplied to some homes and commercial premises. You may experience an interruption to the water supply, or low water pressure. It is also possible that the water supply could become discoloured during the exercise. The discoloration will be due to mineral deposits in the mains becoming disturbed by changes in the flow of water.

As a precaution we have arranged for a water bowser to be in position at Shoprite Car Park, Derby Road, Peel for public use.

The Authority endeavours to keep any disruption to a minimum level and would like to apologise for any inconvenience this may cause.

**If you experience discoloured water
you should run your cold water tap
in the kitchen until it clears or call
695949 during office hours or
695999 out of hours.**
